

Storm Water Issues?

- 1. Do you feel the curbing in our neighborhood is too low to manage water runoff during a heavy storm effectively?**
- 2. Are the drains near your property ineffective due to debris build up or are they collapsing?**
- 3. Does the creek or lake adjoining your property overflow frequently causing damage?**
- 4. Do you experience water pooling in your yard during a heavy rainfall?**
- 5. Do you get water in your basement due to any of the above?**

City of Duluth representatives have offered to hear our concerns and will also share what we can do as homeowners to help lessen storm water buildup.

The City has requested a list of specific addresses with storm water issues in Norman Downes. They have agreed to investigate problem areas in our neighborhood to find a solution.

Please join us Tuesday, July 18th, at 7 PM in the Bunten Park Community Building for this important meeting and educational session.

If you are unable to attend, but would still like the City to be aware of water problems on or near your property, then please fill out the form below and return it to one of the message boxes at the entrances or the pool prior to July 18th.

Let's all work together to get our streams clean and our community beautiful!

Norman Downes HOA
